with the proviso that the NCS enhance, notdegrade, Agency capability and not impair the security of our system. It was recognized that Agency participation in the NCS would result in an increase in personnel and fund requirements. However with the exception of two one-man stations (in Africa) there are no facilities or personnel in place exclusively for others nor were any such facilities anticipated in our 1964 and 1965 budgets. All facilities are in place or were planned to meet the total requirements and the facilities would be eventually required for CIA alone with manpower requirements somewhat reduced if we did not serve others. Fo meet these Communications requirements
